

John Doe

Data Analyst

Email: johndoe@example.com | Phone: +1-234-567-8901 | LinkedIn: linkedin.com/in/johndoe

Professional Summary

Detail-oriented Data Analyst with proven expertise in collecting, cleaning, and analyzing large datasets to generate actionable insights. Proficient in Python (pandas, NumPy, matplotlib, scikit-learn), SQL, and modern data visualization tools including Tableau, Power BI, and Streamlit. Strong background in statistical analysis, exploratory data analysis (EDA), and supporting data-driven decision-making. Familiar with machine learning concepts and experienced in optimizing data pipelines on cloud platforms.

Core Skills

- Data Analysis & EDA
- Python (pandas, NumPy, matplotlib, scikit-learn)
- SQL & Relational Databases
- Data Visualization (Tableau, Power BI, Streamlit)
- Statistical Analysis & Problem-Solving
- Cloud Platforms (AWS, Azure, GCP)
- Machine Learning (Regression, Classification)
- Data Pipeline Optimization
- KPI Tracking & Reporting
- Communication & Collaboration

Professional Experience

Data Analyst | XYZ Analytics | Jan 2020 – Present

- Collected, cleaned, and analyzed datasets from multiple sources to support business intelligence.
- Built dashboards and interactive reports using Tableau, Power BI, and Streamlit.
- Collaborated with cross-functional teams to define KPIs and track performance.
- Conducted exploratory data analysis (EDA) and applied statistical methods to uncover trends.
- Partnered with data engineering teams to optimize data pipelines and workflows.
- Applied machine learning models for predictive analytics, improving forecasting accuracy by 15%.

Junior Data Analyst | ABC Corp | Jun 2017 – Dec 2019

- Assisted in analyzing large datasets and preparing reports for stakeholders.
- Developed SQL queries to extract insights from relational databases.
- Created data visualizations and dashboards in Tableau and Power BI.
- Supported EDA and applied statistical techniques for decision-making.
- Contributed to the migration of analytics workflows to cloud platforms.

Education

Bachelor of Science in Computer Science

University of Data Science, 2017
