PROFESSIONAL SUMMARY

Final-year CSE student (8.8 CGPA) with hands-on experience in AI and Data Science. Skilled in building and deploying RAG pipelines and LLM evaluation systems using Python, Docker, and vector databases. Strong in SQL and data analysis. Eager to apply academic knowledge in a professional setting, learn industry best practices, and contribute to scalable technical solutions as a dedicated intern.

EDUCATION

B.E. Computer Science and Engineering, Easwari Engineering College (2022–2026) | CGPA: 8.8 (Current)

TECHNICAL SKILLS

Programming & Data Analysis - Python (Pandas, NumPy), MySQL, MongoDB, Power BI

Machine Learning & AI - Scikit-Learn, TensorFlow, NLP (NLTK & spaCy), RAG Pipelines

LLM & Vector Databases - LlamaIndex, LangChain, FAISS, Qdrant, Groq API

Web & Automation - Web Scraping (BeautifulSoup), Selenium, API Integration, Chainlit, Streamlit

Deployment & Tools - Docker, Render, Railway, Git, Jupyter Notebook

EXPERIENCE

Machine Learning Intern Prodigy InfoTech | Remote | Mar 2024 – Apr 2024

- Developed a predictive regression model to estimate housing prices, utilizing Pandas for feature engineering and Scikit-Learn for model optimization.
- Built a Convolutional Neural Network (CNN) using TensorFlow to classify images (Dogs vs. Cats), implementing data augmentation to improve validation accuracy.

PROJECTS

Customer Support RAG Chatbot (Flipkart FAQ) | [\[LINK\]](#)

- Developed a production-ready RAG chatbot by scraping Flipkart FAQ data using Selenium, utilizing LlamaIndex and Qdrant for accurate vector search.
- Implemented custom document ingestion, chunking, and retrieval logic, significantly reducing LLM hallucinations.
- Delivered a real-time conversational interface via Chainlit and deployed the fully Dockerized system on Render.

JD-Resume RAG Evaluation System | [\[LINK\]](#)

- Developed an AI-driven resume matching system using LangChain and FAISS for semantic similarity scoring.
- Engineered a dual-mode interface: Applicant Mode for skill gap analysis and Recruiter Mode for multi-resume ranking.
- Integrated Groq API for ultra-fast inference and deployed the application on Streamlit Cloud, enabling real-time, interactive resume scoring.

End-to-End Cricket Data Analysis (T20 World Cup) | [\[LINK\]](#)

- Engineered a data extraction pipeline using BeautifulSoup to scrape real-time ICC Men's T20 World Cup 2024 match statistics.
- Processed raw data using Pandas and designed interactive Power BI dashboards to visualize player performance trends.
